

# Security Controls

Schlage Hand Recognition Systems brings the true security and convenience of biometric technology easily within reach of most access control applications. The [HandKey II](#) utilizes field-proven hand geometry technology that maps and verifies the size and shape of a person's hand all in less than one second.

- REAL Security
- Saves money over card-based systems
- Fast and easy to use
- Increases convenience by eliminating cards
- Integrates into existing systems
- Field proven reliable technology

The benefits of biometric security were once reserved for high-security applications, but the HandKey II changes that. Ten and thousands of HandKeys are already installed in applications that range from health clubs and day care centers to laboratories and prisons. Its ease of use and reliability have made the HandKey the biometric standard for the access control industry. The lower costs of the HandKey II now makes that choice even easier.

## [iScan v100](#)

iScan v100 is a **compact standalone, low cost, fingerprint recognition** based Access controller and Time attendance recorder. It is suitable for small offices, factory or site. iScan is ready to use, easy to install device. iScan can register, store, match fingerprints and save transaction log records in its memory. Log records can be later downloaded to computer for generating and printing reports. Just Press Grey key and place you Finger for instant advanced 1:N Identification matching. Within seconds your fingerprint is identified and access granted. iScan can be attached to standard Electric Strike or Electromagnetic locks. iScan can register up to 100 fingerprints.

## [HNF](#)

Manual Swipe Magnetic Reader with RS-232

- Connects to the PC RS-232C port just like any other peripheral.
- Sits conveniently next to the PC keyboard.
- Easy-to-operate protocol.
- Wide range of configurations available.
- No external power supply required.
